Industry Issues Effecting NoSQL in the Enterprise to be Highlighted at the NoSQL Now! 2012 Conference & Expo

July 31, 2012 11:48 am admin [Leave a Comment](#)

Industry Issues Effecting NoSQL in the Enterprise to be Highlighted at the NoSQL Now! 2012 Conference & Expo NoSQL Now! 2012 Los Angeles, CA (PRWEB) July 26, 2012 DATAVERSITY™ today announced experienced enterprise information strategist, William McKnight, President of McKnight Consulting Group, will keynote this year's NoSQL Now! Conference & Expo at the San Jose Convention Center August 21 – 23. McKnight will highlight a comprehensive agenda of sessions that will feature key topics related to NoSQL in the enterprise. During his informative general session, Putting NoSQL in its Place – in the Enterprise, McKnight will discuss the path that NoSQL is on in terms of enterprise adoption, the obstacles and the way forward. Conference goers will learn where NoSQL adds value to an enterprise information strategy, how to get projects started, and getting IT motivated to adopt Big Data. NoSQL Now! attendees will learn how to evaluate NoSQL enterprise business choices to fi [Read more text](#)

AccuWebHosting.com Adds Windows VPS Hosting to Its Suite of Services

July 27, 2012 8:22 pm admin [Leave a Comment](#)

AccuWebHosting.com Adds Windows VPS Hosting to Its Suite of Services Old Tappan, NJ (PRWEB) July 17, 2012 Since 2003, AccuWebHosting.com has been providing reliable, secure web hosting services. With its move toward providing Windows Virtual Private Servers (VPS) hosting to businesses and professionals across the world, AccuWebHosting.com is able to offer a new alternative to customers interested in the privacy offered by a private Windows hosting server without paying the price. AccuWebHosting.com's Windows VPS hosting offers plans starting at only \$ 19.50 a month, with all Windows VPS hosting plans powered by Windows Server 2008. Each plan comes with backup at no extra charge, as well as storage space and unlimited domains. AccuWebHosting.com's Windows VPS hosting allows your site to run in its own virtualized space, equivalent to having a separate server. AccuWebHosting.com's Windows VPS hosting accounts include a dedicated IP for that website, which provides an additional layer of security and reliability for a website. Eac [Read more text](#)

Repair and Recover Your Corrupt SQL Database

Sometimes, while working in Microsoft SQL, it issues warning messages. A possible database corruption is the reason behind such alarming messages. Though many users ignore such messages and start experimenting with the database, which results in harsher instance of data loss or inaccessibility.

Oracle Guru Joins Texas Memory Systems

July 24, 2012 3:32 am admin [Leave a Comment](#)

Oracle Guru Joins Texas Memory Systems Houston, Texas, USA (PRWEB) May 29, 2008 Texas Memory Systems, maker of the World's Fastest Storage®, today announced the appointment of Mike Ault as resident Oracle guru. Mr. Ault is a recognized Oracle expert and a prolific author, who has published more than twenty Oracle-related books. Increasingly, customers and Oracle database administrators (DBAs) look to Texas Memory Systems to help them analyze and resolve performance constraints in their Oracle-powered applications. By bringing Mr. Ault on board, the company is committed to providing the greatest possible level of expertise to help address database performance challenges and ensure optimal success with deployments of RamSan solid state disks. Solid state storage devices like the RamSan from Texas Memory Systems are deployed to accelerate software applications such as those based on Oracle databases. With solid state disks, applications can accommodate more concurrent users and simultaneous transactions, and can be more economical [Read more text](#)
