Communications and Technology Conference!

Graph databases are HOT! They're a key NoSQL technology enabling a new class of analytical capabilities which simply hasn't been available before with conventional database technologies.

For example, graphs can answer questions like: How will your supply chain be affected by a flood in China? How does a particular financial product impact your portfolio risk? What personal relationships exist between government contractors and local politicians? At NoSQL Now! Attendees will learn how graphs can be used to track the complex relationships between people, organizations and events while providing new answers and insights.

This year's featured Graph sessions will include: Keynote Presentation on Creating Powerful New Applications with Graphs, Emil Elfrem, CEO of Neo Technology Tutorial: Introduction to Graph Databases, led by the technical team from InfiniteGraph.

Intro to Graph Databases 101, Andreas Kollegger, Director of Media and Community for Neo Technology Transform Big Data into Actionable Intelligence with Graphs, Leon Guzenda, Founder of Objectivity, Inc.

Use Graph Databases to Analyze Relationships, Risks, and Business Opportunities - A Case Study, Jans Aasman, CEO of Franz, Inc.

High Performance Graph Database Using Cache, Cloud, and Standards, Bryan Thompson, Chief Scientist of SYSTAP, LLC Lunch 'N Learn with Neo4j, a hands-on mini-workshop from the development team at Neo4j.
